Hengxing University Statement on Information Disclosure and Transparency

I. Overview

Hengxing University regards information disclosure as a key measure for advancing the rule of law and democratic governance within the institution. In strict accordance with the spirit of relevant directives from higher authorities, the university continuously enhances the transparency of all its operations. Through multiple channels, including the official website, departmental websites, WeChat official accounts, and office platforms, the university disseminates various types of information to both internal and external audiences using text, images, audio, and video formats, and actively addresses inquiries of all kinds. In key areas, major decisions, and significant events, the university promotes the disclosure of information regarding decision-making, implementation, management, services, and outcomes. The university's official website and WeChat official account serve as the primary channels for information dissemination, covering both news promoting the development of the university's various undertakings and important information regarding the university's operations and governance. Currently, the primary language of the website is Chinese, while the English version is being gradually expanded and optimized.

II. Content and Channels of Information Disclosure

1. University Overview

The university's official website (https://www.hx.cn/) features an "Overview" section covering the university profile, current leadership, organizational structure, honors and awards, and location and transportation. It discloses information on the scale of operations, the division of responsibilities among the leadership team, organizational structure, academic disciplines and programs, the number of enrolled students, and the number of faulty member.

The “Information Disclosure” section (https://gk.hx.cn/ Information Disclosure) includes subsections on Rules and Regulations of Information Disclosure, Basic Information of the University, Student Admission and Employment, Teaching and Research Management, Student Management and Services, Faculty, Financial, Asset, and Fee Disclosures, and Other Information.

The page contains the address, phone number, and email for “Information Disclosure Handling” and “Supervision and Complaint Handling Information".

The university also publishes relevant management regulations and provides services through its functional departments, including the Office of Academic Affairs, the Office of Quality Assessment, the Human Resources Office, the Office of Research, the Library, and the Finance Office.

The Academic Affairs Office website (https://jw.hx.cn/) publishes service procedures (such as the process for current students to retain their student status) as well as teaching management regulations covering six areas: teaching development, teaching operations, practical training, research management, student registration and degree management, and teaching quality and monitoring (such as the Detailed Rules for Major Development Management at Hengxing University, the Detailed Rules for Standardized Examination Management at Hengxing University, the Detailed Rules for Undergraduate

Graduation Internship Management at Hengxing University, Implementation Rules for the Conferral of Bachelor's Degrees at Hengxing University, and Detailed Rules for the Investigation and Handling of Academic Misconduct at Hengxing University).

Figure 2: Management Regulations Page on the Office of Academic Affairs Website

The Office of Quality Assessment (https://jx.hx.cn/) is responsible for the university's comprehensive quality management. It publishes documents such as the *Detailed Rules for Course Evaluation* and the *Detailed Rules for Teaching Inspection Work*, and releases the *Undergraduate Teaching Quality Report* and teaching bulletins annually.

2. Educational and Academic Information

The university's official website publishes information such as academic programs, newly added majors, and academic status adjustments.

Faculty, students, and academic administrators can access information on courses, registration, grades, and major changes through the Academic Affairs Management System (https://jwgl.hx.cn).

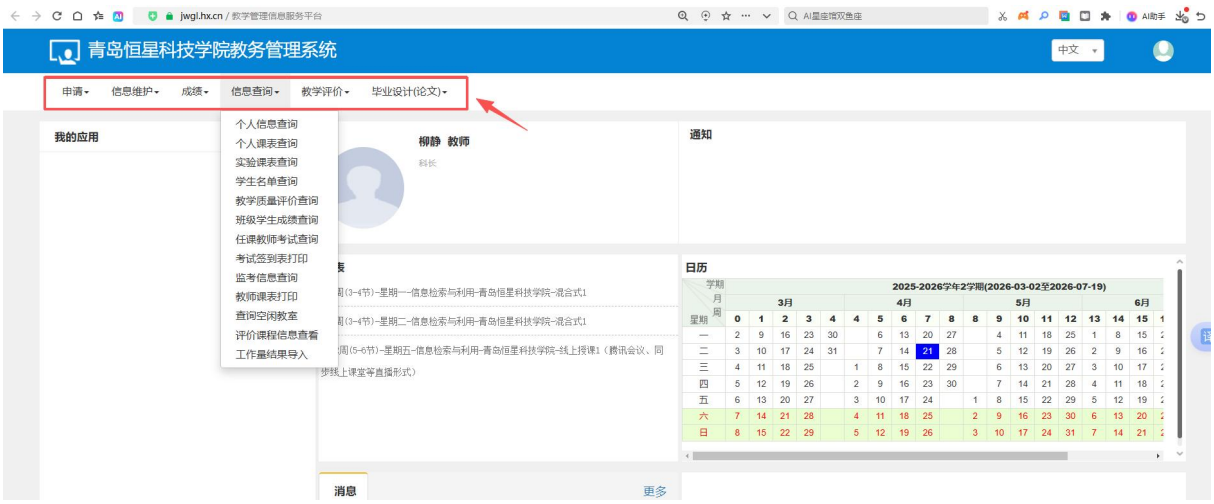

Figure 5: University Academic Affairs Management System

The university also maintains a Graduation (Thesis) Project Management System (https://vgms.fanyu.com/) for students and faculty advisors. Students can use this system to submit their thesis topics, proposal reports, and midterm reports, as well as their final theses. Faculty advisors can enter comments and grades, and communicate with students.

3. One-Stop Student Service Information

The “Campus Services” page on the university’s homepage integrates twelve functional entry points: the OA system, academic affairs management system, email system, information disclosure, campus map, VR Star, graduation registration, graduation certificates, admission inquiry, art major score inquiry, independent enrollment scores, and site search. These comprehensively cover key areas such as administrative operations, academic affairs, information disclosure, admissions, and graduation verification. Among these, the “Academic Affairs Management System” allows students to view courses, grades, and apply for major changes; the “Admissions Inquiry,” “Arts Program Score Inquiry,” and “Special Enrollment Results” portals demonstrate the openness and transparency of the admissions process. “Graduation Registration” and “Diploma” facilitate students’ access to degree and transcript information; and the “Information Disclosure” button links directly to the university’s information disclosure sub-site (gk.hx.cn), where regulations, descriptions of responsibilities, and channels for supervision and complaints are centrally published. Through functional categorization and a one-stop portal design, this page effectively supports the university’s commitment to information accessibility, procedural openness, and transparency of outcomes.

Figure 7: The “Campus Services” Page on the University’s Website Homepage

The interface shown below is the homepage of Hengxing University’s official admissions website (zs.hx.cn). It features navigation bars for the Admissions Homepage, Majors, Enrollment Plan, Application Guide, Admission Status Inquiry, Online Consultation, Honor Roll for Postgraduate Entrance Exams, and University Website, and displays the national institution code 13015. It prominently displays the “2026 Admissions Regulations” for the current year, as well as application information such as the university profile, admissions brochure, historical admission scores, and subject selection requirements.

5. Information on International Exchange and Cooperation

The university publishes information on cooperation programs with overseas universities, student exchange programs, study tours, internships, and study abroad opportunities, as well as regulations governing international faculty and students, through its official website, the International Affairs Office website (https://gjc.hx.cn/), WeChat official account, and the OA platform.

6. School and College Information

The university's specialized schools currently maintain independent websites, featuring content such as: school profiles, education and teaching (including program offerings, curriculum plans, and regulations), faculty, teaching and research, ASIIN accreditation, admissions and career services, and student club activities.

The university continues to optimize its website development by improving unified cross-media access services, expanding the scope of publicly available information, and providing more content in English to facilitate international exchange.
